INSTALLATION

NOTE:

• Make sure the vehicle and the nose mask are clean and completely dry before installation. If moisture under the mask is allowed to dry, it may cloud the paint. If the mask gets wet, remove it and allow it to air-dry completely.

• Make sure any repainted surfaces are cured.

• Make sure the hood and nose of the vehicle have been waxed with a high-quality paste wax.

• Make sure to install the nose mask securely. If the nose mask starts to flap or comes loose while driving, safely pull off the highway, stop the vehicle, and secure or remove the mask.
Displaying the License Plate

If your state law requires the display of both license plates, cut out the piece of the bumper section that covers the front license plate:

• Face the inside of the mask towards you.

• Carefully cut out the license plate section with scissors at the top seam, and remove the overcast stitching.
