10 mm and 14 mm Sockets
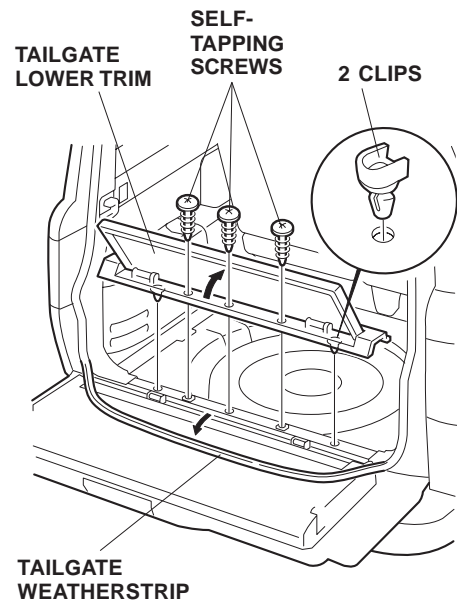

Torque wrench

Clip remover

INSTALLATION

Customer information: The information in this installation instruction is intended for use only by skilled technicians who have the proper tools, equipment, and training to correctly and safely add equipment to your vehicle. These procedures should not be attempted by "do-it-yourselfers."

1. Make sure you have the anti-theft code for the radio, then write down the frequencies for the preset buttons.

2. Disconnect the negative cable from the battery.

3. Open the upper and lower tailgates and take out the cargo area floor (two hooks).

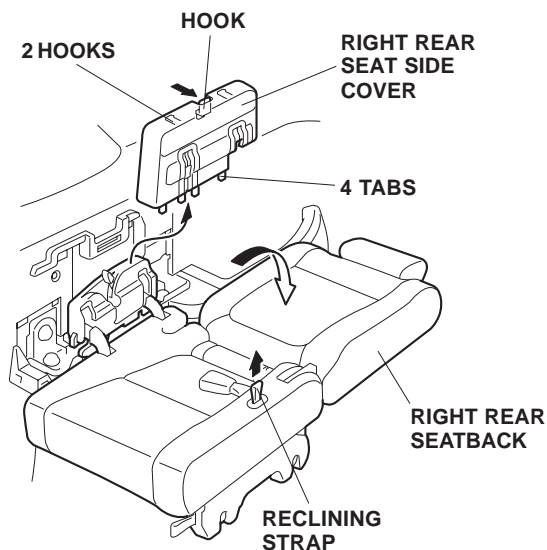

CARGO AREA FLOOR • HOOKS • LOWER TAILGATE

4. Raise the tailgate lower trim and remove the three self-tapping screws that fasten the tailgate lower trim. Remove the lower trim (two clips).

TAILGATE LOWER TRIM • SELF-TAPPING SCREWS • 2 CLIPS • TAILGATE WEATHERSTRIP

5. Remove the tailgate weatherstrip from the area shown.

6. Pull up on the reclining strap to tilt the right rear seatback down, then remove the right rear seat side cover by pulling the hook in the direction shown to release the two hooks and four tabs.
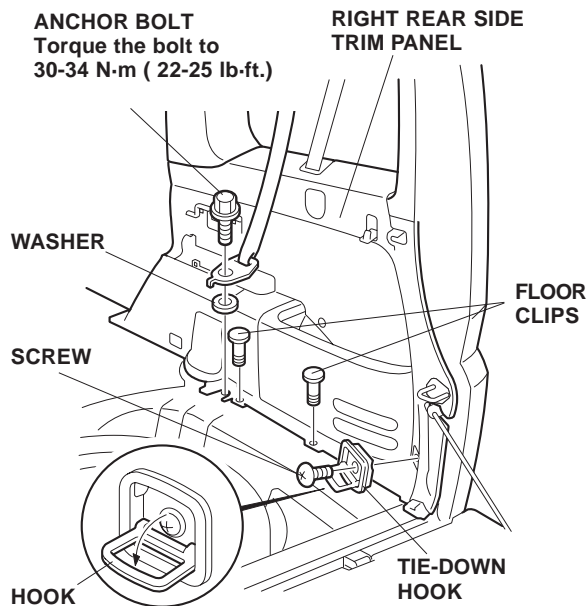

2 HOOKS   **HOOK**   **RIGHT REAR SEAT SIDE COVER**   **4 TABS**   **RIGHT REAR SEATBACK**   **RECLINING STRAP**

7. Unlock the right rear seat by pulling the right rear seat foot lock release strap out toward you.

**LEVER**   **RIGHT REAR SEAT**   **FOOT LOCK RELEASE STRAP**

8. Push the lever in the direction shown, then remove the right rear seat by lifting the rear of the seat and sliding the seat towards the rear of the vehicle.
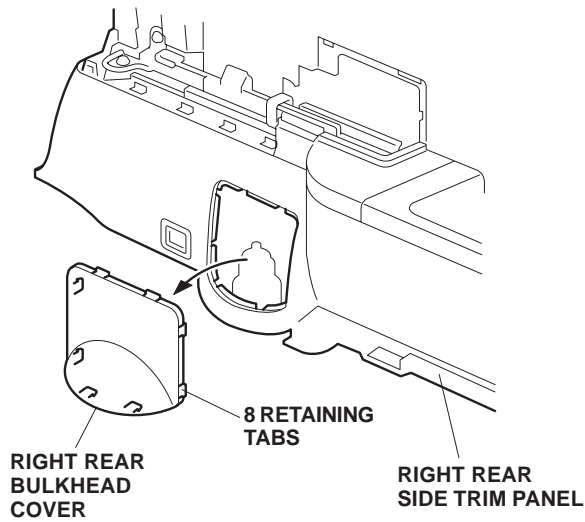

9. Remove the tie-down hook from the right rear side trim panel (one screw).

ANCHOR BOLT Torque the bolt to 30-34 N·m (22-25 lb·ft.)   **RIGHT REAR SIDE TRIM PANEL**   **WASHER**   **SCREW**   **FLOOR CLIPS**   **HOOK**   **TIE-DOWN HOOK**

10. Remove the two floor clips.

11. Remove the anchor bolt and washer that fasten the seat belt.

12. Open the plastic covers and remove the self-tapping screws concealed under the covers. Open the cargo net hook plastic cover and remove the self-tapping screw concealed under the hook. Remove one additional self-tapping screw just behind the cargo net hook.

13. Remove the right rear bulkhead cover from the right rear side trim panel (eight retaining tabs).

8 RETAINING TABS

**RIGHT REAR BULKHEAD COVER**

RIGHT REAR SIDE TRIM PANEL

14. Remove the rear portion of the right rear side trim panel by pulling it out toward you (three clips and three retaining tabs). It is not necessary to remove the entire trim panel.
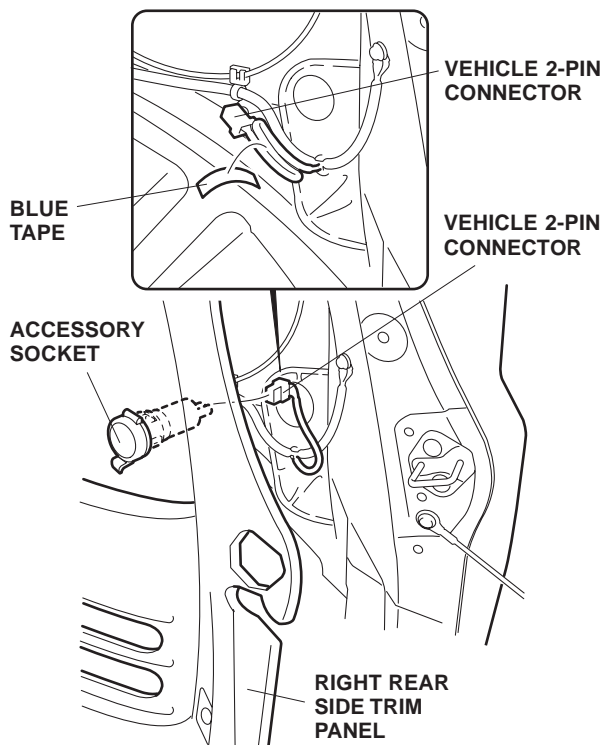

3 RETAINING TABS

3 CLIPS

RIGHT REAR SIDE TRIM PANEL

15. Remove and discard the cover from the right rear side trim panel. Slide the accessory socket protector into the vacant hole and align the tab on the protector with the cutout in the panel.

RIGHT REAR SIDE TRIM PANEL

18. Reinstall the right rear side trim panel.

19. Remove the stoppers from both sides of the glove box, and lower the glove box.

STOPPER

GLOVE BOX

20. Install the relay into the relay block in the glove box opening.

RELAY

RELAY BLOCK

GLOVE BOX OPENING

21. Test the accessory socket.

22. Reinstall all removed parts.

23. Reconnect the negative cable to the battery.

24. Enter the customer's radio anti-theft code, if applicable, and reset the radio station presets.

25. Reset the clock.

NOTE: When the battery is disconnected, the driver's window AUTO function is disabled.

26. Start the engine. Push down on the driver's window switch until the window is fully open.

27. Pull up on the driver's window switch fully to close the window completely, then hold the switch for 2 seconds or more.

28. Test the window AUTO function.
