FLANGE BOLT

BRACKET B

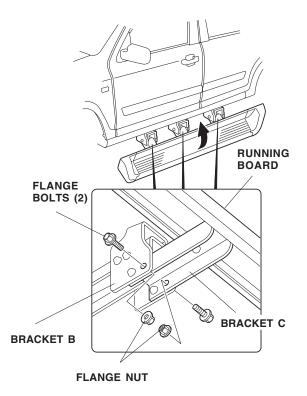

- 2. Position the three brackets A in the brackets B you just installed, and install the six flange bolts and four flange nuts for each bracket A. Torque all the flange bolts to 27 N·m (20 lb-ft).
  - a **BRACKET A** T (Use the two BRACKET A outer holes.) (Use the two N inner holes.) 000 000 BRACKET B BRACKET B FLANGE BOLTS (4) FLANGE BOLTS (4) Ø FLANGE BRACKET A **BRACKET A** BOLT FLANGE FLANGE NUTS (4) BOLT FLANGE NUTS (4)
- 3. Position the three brackets C in the brackets B, and install the two flange bolts and two flange nuts. Do not tighten them yet.

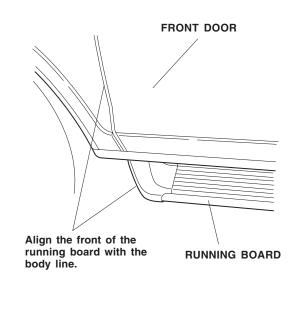

4. Insert the six studs of the running board into the holes in the three brackets C, then install a flange nut on the end of each stud, but do not tighten the flange nuts yet.

5. Raise the running board to align the holes in the brackets B with the holes in the brackets C. Install and tighten the two flange bolts and the two flange nuts.

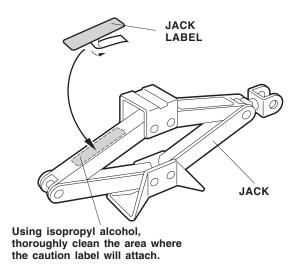

6. Adjust the front of the running board, so it's equal with the body line, then tighten the six flange nuts installed in step 4.

- 7. Tighten all the flange bolts installed in step 3.
- Torque all the flange nuts and bolts to 27 N·m (20 lb-ft).
- 9. Repeat steps 1 through 8 to install the running board on the right side.

## Installing the Jack Label

10. Remove the jack from the cargo area. Refer to the vehicle Owner's Manual in the glove box.

- 11. Using isopropyl alcohol on a shop towel, clean the area where the caution label will attach.
- 12. Remove the adhesive backing from the jack label, and attach it to the jack in the area shown. Reinstall the jack in the cargo area.
- 13. Insert the owner's manual page from this kit into the vehicle Owner's Manual, and place the Owner's Manual in the glove box.
